EDUCATION AND TRAINING

Computer Engineering

Career completed (Degree in process) 1990–1996
Universidad Nacional Autónoma de México
Escuela Nacional de Estudios Profesionales Aragón, Edo. Méx.

In addition to various courses and updating in the areas of systems, computer networks, implementation of information technologies, operation and monitoring of telecommunications technologies and Project and Personnel Management.

- **English language 80%** spoken and written.
- Update course in **Git and GitHub** by Oracle-Alura
- Update course in **HTML5 and advanced CSS3** by Oracle-Alura
- Update course in **JavaScript for Font End** by Oracle-Alura
- Refresher course in **Personal Development** by Oracle-Alura
- Refresher course in **project management with agile methodologies** and Scrum
- Training **in Negotiation and Conflict Management** in the human development program of Televisa.
- **Leadership training** in Televisa's human development program.
- **Teamwork training** in Televisa's human development program.
- **Quality in Service training** in Televisa's human development program.
- **Microsoft LAN and WAN Network**, architecture end Implementation Update training.
- **ITIL 3 training**
- Constant training in **relation to the service and customer service** of Izzi, personnel management (handling of objections).
- **Website Creation** and **Electronic Commerce** courses.

CURRENT ACTIVITIES

Interingenia, S.C.
Pre-sales consultant for monitoring solutions
Since June 2022

Responsible for advising customers in pre-sales regarding monitoring solutions for information technology and telecommunications.

- I am currently training in a solution called Datadog specialized in monitoring technologies.
- Receiving training in Kubernetes and Dockers.
- Creation of web pages, eCommerce and digital marketing.
- Receiving update training in Java and JavaScript for Frontend Development from Oracle-Alura.

LAST JOB

Cablevisión S.A. de C.V. in CDMX (Izzi Telecom)
NOC Innovation and Development Manager
November 2000 to April 8, 2022 (21 years)

Manager responsible for monitoring the different technologies used to offer Izzi's Triple Play and OTT services nationwide.

- Responsible for the administration of almost 50 managers of technologies and monitoring solutions with a work team of up to 19 engineers that allowed the correlation of events and in turn the creation and enrichment of Incidents that are assigned to the responsible areas for their timely attention.
- Responsible for the successful integration of Cablevision monitoring with the companies acquired by Grupo Televisa, Cablemas, Cablecom-Metro Red, Bestel, Telecable and TVI; as well as the definition of the architecture for this integration.
- Experience as head of NOC and Customer Service via telephone; solution of problems in different operating systems, related to Internet access through broadband Internet in addition to digital decoders, advice on the implementation of Internet service and Training to the Call Center and related areas.
- Responsible for the acquisition of technologies, including the evaluation of software, hardware and support offered by suppliers.

PREVIOUS JOBS

Family Business (freelance) CompuAsist.com.mx
CIO
April 2000

Corrective and preventive maintenance of computer equipment and networks, purchase, sale and installation of computers, peripherals and computer networks; personalized advice for the implementation of computer centers and development of Web systems as well as training and training in computer systems.

Evolución Integral S.A. México, D.F.
Systems Manager
January 2000 to March 2000

During the first year I only worked on required times in addition to technical advice via telephone; later full time, taking care of the optimal performance of all the computer equipment used in the company, in addition to advising and giving technical support to solve immediate problems of the personnel both Hardware and Software level.

Confederación Nacional Campesina México, D.F.
Systems Manager
September 1996 to December 1999

In the first two years I worked in the Ministry of Domestic Trade in charge of carrying out a system of delivery reception of information for agricultural marketing at the national level; as well as the production and dissemination (via Internet and fax) of daily and weekly bulletins with such information; as well as the maintenance of computer equipment and support to various areas related to the Secretariat and a network project for the CNC facilities.

Applications and monitoring systems that my team and I implemented in Izzi Telecom

Resumen de Syslogs
Cirries Metro
- 2 Appliances
- 2 ubicaciones diferentes

Cirries Interior
- 2 Appliances
- En implementación

Splunk
- 2 Servidores
- 2 ubicaciones diferentes

Syslog NMIS
- 2 Instancias
- 2 ubicaciones diferentes

Resumen de Video
IneoQuest
- 39 DVAs
- 180 Criketes QAM
- 13 G2X
- 56 Frame Grabbers
- 29 Ubicaciones diferentes

Witbe
- 6 Robots de video
- 6 Ubicaciones diferentes

Resumen de Netcool
Gestor de Gestores con 5 instancias
- Correlaciones
- Monitoreo de Gestores
- Monitoreo de servidores
- Enriquecimientos
- CMDB
- BD administradas
- 5 ubicaciones diferentes

Ambiente virtual y físico
- 87 ESX de VMWare (77/10)
- 551 Servidores virtuales (374/177)
- 206 Servidores físicos (196/10)

Resumen de HFC y FTTH
ServAssure Advance - HFC
- 3 Instancias
- 180 Starnodes 13 G2X
- 56 Servidores de Core SAA
- 29 Ubicaciones diferentes

ServAssure NXT - HFC
- 180 Starnodes 13 G2X
- 56 Servidores de Core SAA
- 29 Ubicaciones diferentes

xPMS - FTTH
- 1 Instancia
- 2 Servidores de Core SAA
- 29 Ciudades cubiertas

Resumen de Medidores de Velocidad
FTPs y HTTPs
- 33 Servidores FTPs
- 9 Servidores HTTPs

Ookla
- 10 Servidores
- 10 Ubicaciones diferentes

Resumen de Performance Manager
SevOne
- 42 Appliances
- 3 HSA
- 12 ubicaciones diferentes

PRTG
- 7 Servidores
- 2 Sondas
- 3 ubicaciones diferentes

NMIS
- 3 Instancias
- 3 ubicaciones diferentes

Seguridad, VPNs y SW Intersitios
Sonicwall
- 34 Appliances
- 34 ubicaciones diferentes

Switches
- 39 Switches
- 39 ubicaciones diferentes

TACACS - Seguridad
- 3 Servidores

ACHIEVEMENTS

During my stay in Izzi, before Cablevision the following are some achievements and skills that I developed during the almost 22 years; It is worth mentioning that initially it was only a company called Cablevision that its services only covered the metropolitan area.

Later Grupo Televisa acquires other companies also cable companies such as Cablevision de Monterrey TVI, Cablemas, Telecable, Cablecom and Axtel; in addition to the Carrier Bestel and Metro Red that expanded its presence throughout the Mexican Republic.

Go through different positions such as:

- Head of CallCenter Capture
- CallCenter Supervisor
- Head of Noc
- Noc Manager

- Implementation of an automated monitoring of different technologies with which Izzi provides its final services, this during the almost 22 years I served Izzi, formerly Cablevision; this includes the integration of automatic Incident Collection.
- Successful integration of all technology monitoring of the companies acquired by Grupo Televisa to its main cable company, Cablevision, which formed the new company called Izzi including the change of the architecture of the solutions.
- Strategic decision for the use of the best monitoring solutions, standardizing monitoring in the companies that make up Izzi. Cost-Benefit Assessment.
- • Implementation of international best practices in the monitoring of the different technologies used for the services offered by Izzi. In part, this situation led to Cablevision being chosen to monitor the other Cable companies and Carriers acquired by the Televisa group.
- Evaluation of different monitoring solutions through Proofs of Concept - POC some of them are:

  - FTTH and HFC Monitoring - Zcorum, xPMS, CCOR, Auspice, AvSystem
  - Performance Monitoring for Network Equipment - SevOne, NMIS, CA Spectrum and PM
  - Monitor Monitor - IBM Tivoli Netcool, HP Site Scope, SM4RT, HP Network Node Manager, BMC
  - Log Monitoring - NMIS, Cirries, Spluk
  - Monitoring using Machine Learning - IBM Predictives, Cirries Machine Learning
  - Implementation of various monitoring solutions.
  - For Manager of Manager - Tivoli Netcool Suite (ITM, ITNM, OMNIBUS, Impact)
  - For monitoring transactions, changes and dependencies - TADDM, CCMDB, ITCAM, Change Management
  - For Performance Monitoring - SevOne, IBM Tivoli Network Manager, IBM Performance Manager, NMIS, SolarWinds
  - For HFC network monitoring - ServAssure Advance and its new version ServAssure NXT
  - For monitoring HFC network syslogs - Splunk, NMIS
  - For OTT Video Monitoring - Witbe Robots
  - For speed measurement for customers - 11 locations around the Mexican Republic of the Ookla Speedtest for Izzi
  - For internal speed measurement for clients - 42 servers were implemented that allow internal measurement of client speeds of both the FTTH and HFC network that allows the diagnosis of interconnection at the internal level
  - For project management - DotProject
  - To keep Callcenter and Noc informed - Intranet and IntraNoc

SKILLS

Thanks to the experience gained during my working life, I can point out for myself the following acquired skills.

- Management of technical personnel with 6 work teams
  - Video Team
  - HFC and FTTH Team
  - Development Team
  - Team of Managers
  - onfrastructure Team
  - Network Performance Team
- Dealing with suppliers
- Media negotiation
- Resource and infrastructure management
- Project and task management
- Application evaluation
- Analysis for event enrichment and correlation
- Handling customer service calls
- Ability to learn how to use and manage systems quickly

VALUES I PROFESS

Professional	Personal	Human	Family
• Ethics	• Amiability	• Love	• Respect
• Commitment	• Loyalty	• Honesty	• Courtesy
• Flexibility	• Honesty	• Self-control	• Gratitude
• Adaptation	• Responsibility	• Solidarity	• Reliability
• Tolerance	• Discipline	• Goodness	• Fraternity
